

**STATEMENT**  
**No. MAC132517CS**

Genova 09/05/2018

On the basis of Report No. "Test Protocol R01" and RINA Report No. 2017CS011325, it is hereby stated that, during the test dated **12/12/2017** performed in "ECOSPRAY Technology" production Site at Alzano Scrivia (AL), the scaled version of the **SCR System Type "ECO-NOx"**, installed on engine having NOx emission value within the applicable limits in accordance with Standard IMO TIER I (output power 114 kW/cyl), was tested as per IMO Resolution MEPC.291(71) Para. 6 "Test Procedure for Scheme B", performing the operation cycle "E3" for propulsion engines as defined in "NOx Technical Code 2008 Ch. 3.2.4 Tab.2".

Such test demonstrated that the System is able to reduce the NOx emission within the limit required by IMO TIER III Standard of Annex VI MARPOL
